

Brainstorming & Ideation

Date	26 June 2026
Team ID	
Project Name	Credit Card Approval Prediction

Empathy Map

User

Bank customers, credit analysts, loan officers, financial institutions, and applicants interested in checking credit card eligibility.

Says

- "I want to know whether my credit card application will be approved."
- "Can I check my credit card eligibility instantly?"
- "I need a quick and accurate approval prediction."
- "I want an easy-to-use web application."

Thinks

- "Manual application screening is time-consuming."
- "Machine learning can automate approval decisions."
- "The prediction should be reliable and transparent."
- "The application should classify approval or rejection."

Does

- Enters applicant details.
- Provides income and employment details.
- Enters credit history.
- Provides financial information.
- Clicks the Predict button.
- Views approval/rejection result and risk category.

Feels

- Confident using a simple interface.
- Satisfied with quick prediction results.
- Curious how financial factors affect approval.
- Interested in improving credit eligibility.

Pain Points

- Manual approval processes are slow.
- Difficulty understanding approval criteria.
- Existing systems may require expert review.
- Waiting for approval decisions takes time.

Gains

- Fast and accurate approval prediction.
- User-friendly web interface.
- Better understanding of approval factors.
- Supports banks in making faster and more consistent decisions.
